

## Adding a result

1. Log into your club play cricket site.
2. Go to Administration by clicking on your name in the top right and then "Administration", then click results on the Left hand side.
3. Find the match that you want to enter the result for and click the edit icon.

You will see a summary screen where you need to add the Result, and the individual team scores including overs used, and who batted first.

The other details such as umpires and scorers is at your discretion, like the score cards later on you can add as much or as little information as you want as long as the basic match information is there. **Click Save**

4. On the next page you will be asked to enter the team. **Recommendation - Enter the team in batting order.**

This will make life easier in the scorecard page.

5. Add players by clicking on the players from the squad on the right hand side, also select the captain and wicketkeeper.
6. If the player you want is not in the list, I would recommend that you leave blank and e-mail the opposing team manger, and leave for them to add the player details at a later date, the player can be called "unsure" Again click Save

## Adding a result

- You will then come to the home team scorecard, if you have put the players in the teams in scorecard order the batting order will now be filled in, go through each player and add how out, fielder where applicable, bowler and no of runs per batsman.
- Add the extras, the score should now add up to the score you entered in the summary scorecard. If you want to add number of 4's and 6's and balls faced that is up to you but not mandatory.
